Purpose of Form: The SMA-168 form was created to facilitate the submission and review of patient exceptions under 42 CFR § 8.11(h). SAMHSA will use the information provided to review "patient exception requests" and determine whether they should be approved or denied. A "patient exception request" is a request signed by the physician for approval to change the patient care regimen from the requirements specified in Federal regulation (42 CFR, Part 8). The physician makes this request when he/she seeks SAMHSA approval to make a patient treatment decision that differs from regulatory requirements.

This is a flexible, multi-purpose form on which various patient exception requests may be documented and approved or denied, along with an explanation for the action taken. It is most frequently used to request exceptions to the regulation on the number of take-home doses permitted for unsupervised use, such as during a family or health emergency. The form is also frequently used to request a change in patient protocol or for an exception to the detoxification standards outlined in the regulation.
